Admin Portal User Guide

Complete feature guide for HR administrators & payroll teams

PAYROLL HR MANAGEMENT SYSTEM

Documentation edition | July 2026

Confidential – for authorised users only

Introduction

The Admin Portal is the control centre for your organisation. Use it to manage employees, process payroll, review attendance and leave, run reports, and configure company policies. Access requires an admin username, password, and authorised branch.

Document scope

- Portal: Admin Portal
- Product: Payroll HR Management System
- Modules documented: 26
- Audience: HR admins & payroll staff

Key workflows

These diagrams show how common tasks flow through the system.

Monthly payroll cycle

Leave approval flow

New employee onboarding

Overview

Dashboard

At-a-glance view of headcount, attendance health, pending approvals, and payroll status for the active branch.

KEY FEATURES

- Branch-wise summary cards and quick stats
- Pending approval counts with direct links
- Recent activity and payroll period indicators
- Shortcuts to high-traffic modules

HOW TO USE

1. Sign in at Admin Login with your branch selected.
2. Review dashboard widgets for the current month.
3. Click any stat card to jump to the related module.

People & HR

Employees

Maintain the employee master “ personal details, job information, salary structure, documents, and portal access.

KEY FEATURES

- Add, edit, activate/deactivate employees
- Department, designation, manager & branch assignment
- Salary components and bank details
- Document verification and profile change requests

HOW TO USE

1. Open Employees from the sidebar.
2. Use Add Employee or search an existing record.
3. Complete personal, job, and payroll tabs before saving.
4. Review pending document requests from the employee view.

Departments

Organise employees into departments for reporting, org structure, and filtering.

KEY FEATURES

- Create and rename departments
- Assign employees during onboarding
- Used across reports and org chart

HOW TO USE

1. Navigate to Departments.
2. Add or edit department names.
3. Map employees from the Employees screen.

Org chart

Visual hierarchy of managers and direct reports across the organisation.

KEY FEATURES

- Manager“report relationships
- Drag-free read-only tree view
- Helps validate team structure

HOW TO USE

1. Set each employee's manager in their profile.
2. Open Org chart to verify reporting lines.

Recruitment

Track job applicants through hiring stages from applied to hired.

KEY FEATURES

- Pipeline stages: applied, screening, interview, offered, hired, rejected
- Applicant notes and status updates
- Export candidate list

HOW TO USE

1. Add new applicants with role and contact info.
 2. Move cards across stages as hiring progresses.
 3. Mark hired to begin onboarding in Employees.
-

Performance

Run performance review cycles with self-review and manager evaluation.

KEY FEATURES

- Review cycles with open/closed status
- Employee self-assessment forms
- Manager ratings and feedback
- Export review data

HOW TO USE

1. Create or open a review cycle.
 2. Assign employees to the cycle.
 3. Monitor completion from the performance board.
-

Exit & F&F

Manage resignations, notice period, full & final settlement, and exit PDF.

KEY FEATURES

- Exit initiation and status tracking
- F&F calculation breakdown
- Settlement PDF generation
- Clearance workflow

HOW TO USE

1. Record exit when resignation is approved.
 2. Enter settlement components.
 3. Generate F&F PDF for finance sign-off.
-

Helpdesk (admin)

Respond to employee support tickets raised from the employee portal.

KEY FEATURES

- Ticket queue by status: open, answered, closed
- Reply with admin notes
- Filter by branch

HOW TO USE

1. Open Helpdesk from People section.
 2. Select a ticket and read employee description.
 3. Post reply and update status.
-

Expenses

Review and approve employee expense claims submitted through the portal.

KEY FEATURES

- Pending / approved / rejected filters
- Receipt attachment review
- Amount totals by employee
- Branch-scoped listing

HOW TO USE

1. Open Expenses.
2. Filter pending claims.
3. Approve or reject with a review note.

Assets

Track company assets assigned to employees such as laptops, phones, and equipment.

KEY FEATURES

- Asset register with categories
- Assign to employee with date
- Return tracking on exit

HOW TO USE

1. Add asset with category and serial info.
2. Assign from employee profile or assets list.
3. Mark returned when employee exits.

Calendar & communication

Holidays

Define public holidays per branch that affect attendance and payroll.

KEY FEATURES

- Branch-specific holiday calendar
- Bulk upload template
- Reflects on employee attendance calendars

HOW TO USE

1. Add holidays manually or upload spreadsheet.
 2. Verify holidays appear on team calendar.
-

Weekoff roster

Configure weekly off patterns and exceptions for employees.

KEY FEATURES

- Default weekoff rules
- Employee-level overrides
- Feeds attendance calculation

HOW TO USE

1. Set roster pattern for branch or employee.
 2. Sync attendance after changes.
-

Team calendar

Admin view of who is on leave and branch holidays for a selected month.

KEY FEATURES

- Month navigation
- Leave overlay on calendar
- Holiday markers

HOW TO USE

1. Pick month and branch context.
 2. Review leave density before approvals.
-

Announcements

Publish company-wide or branch-specific news visible in the employee portal.

KEY FEATURES

- Pin important posts
- Rich text body
- Instant visibility on employee dashboard

HOW TO USE

1. Create announcement with title and body.
 2. Optionally pin for top placement.
 3. Publish – employees see it immediately.
-

Attendance

Upload attendance

Import or correct monthly attendance records before payroll processing.

KEY FEATURES

- Spreadsheet import
- Manual month grid
- Clear month utility
- Status codes: present, absent, leave, etc.

HOW TO USE

1. Select year and month.
2. Upload file or edit grid cells.
3. Validate totals before payroll run.

Punch logs

Raw punch-in and punch-out events from biometric, web, or manual entry.

KEY FEATURES

- Filter by employee and date range
- Late / early flags
- Missing punch detection
- Delete erroneous punches

HOW TO USE

1. Search employee or date.
2. Investigate anomalies.
3. Cross-check with punch report.

Punch report

Summarised punch analytics â€” work hours, late ins, early outs per employee.

KEY FEATURES

- Period-based summary
- Export-friendly table
- Supports regularization decisions

HOW TO USE

1. Choose payroll month.
2. Export or review outliers.
3. Follow up via employee regularization requests.

Leave

Approvals

Central inbox for leave, attendance correction, WFH, regularization, and related requests.

KEY FEATURES

- Unified pending queue with counts
- Approve / reject with comments
- Automatic attendance sync on leave approval
- Expense and profile requests included

HOW TO USE

1. Open Approvals “” badge shows pending count.
2. Review request details.
3. Approve or reject; employee is notified.

Leave history

Historical log of all leave transactions across employees.

KEY FEATURES

- Filter by employee, type, status
- Audit trail of decisions
- Useful for dispute resolution

HOW TO USE

1. Search employee or date range.
2. Export or review approved vs rejected.

Leave balances

View and adjust yearly leave quotas and consumed balances.

KEY FEATURES

- Per leave-type balance
- Manual balance correction
- Quota from settings applied annually

HOW TO USE

1. Select employee.
2. Review balance columns.
3. Adjust if carry-forward or correction needed.

Payroll

Payroll center

Core payroll engine will calculate salaries from attendance, apply deductions, lock periods.

KEY FEATURES

- Monthly salary calculation per employee
- Paid days from attendance integration
- Adjustments and arrears
- Period lock to prevent changes after processing

HOW TO USE

1. Ensure attendance is finalised for the month.
2. Open Payroll center and select period.
3. Run calculation and review totals.
4. Lock period when satisfied.

Slip logs & distribution

Generate PDF salary slips and email them to employees.

KEY FEATURES

- Bulk slip generation
- Send history log
- Resend individual slips
- Employee download in portal

HOW TO USE

1. After payroll lock, open slip logs.
2. Generate slips for the period.
3. Send to employees via configured SMTP.

Reports & system

Reports

Attendance and payroll analytics for management review.

KEY FEATURES

- Attendance summary report
- Payroll cost report
- Punch analytics
- Branch filters

HOW TO USE

1. Choose report type.
2. Set date range and branch.
3. Review on screen or export.

Roles & permissions

Control which admin users can access each module.

KEY FEATURES

- Role-based permission matrix
- Assign roles to admin users
- Granular module toggles

HOW TO USE

1. Define role in Roles screen.
2. Tick permitted modules.
3. Assign role when creating admin user.

Audit log

Security and compliance trail of sensitive admin actions.

KEY FEATURES

- Timestamped action records
- User attribution
- Filter by action type

HOW TO USE

1. Open Audit log periodically.
2. Investigate unusual entries.

Settings

Company profile, payroll rules, leave types, punch policy, SMTP, and branches.

KEY FEATURES

- Company name, logo initial, policies HTML
- Salary split percentages and statutory settings
- Leave types and yearly quotas
- Office timings, grace minutes, face login toggle
- SMTP for slip and notification emails

HOW TO USE

1. Open Settings tabs one by one.
 2. Save each section after changes.
 3. Test SMTP from settings tools.

Thank you for using Payroll HR Management System

For setup and technical configuration, refer to your system administrator.

Support checklist

- Ensure attendance is synced before monthly payroll.
- Keep employee documents verified for compliance.
- Review pending approvals daily to avoid payroll delays.
- Configure SMTP in Settings for slip email delivery.
- Employees should use the latest portal password policy.
